THE UNIVERSITY of ADELAIDE

Introduction

Our web-based application is designed for students who are currently studying majors related to Computer Vision, Deep Learning, and Robotics, and for employers or companies that looking for talented people via our website. In particular, students can show off their work or their achievement by uploading their videos or resume on the website. For employers, companies, or organization related to these fields can post recruitment information on the website. By providing those functions, students can share their work, learn new knowledge, connect to the community, and have a high chance to get the right job. Employers or companies can have many choices to find talented people and totally fit the positions they needed.
